

OBUYISI BW'OMU INITIATIVE

Organisation Profile

Community-Based Organisation, Kawanda — Wakiso District, Uganda | Donor Package 2026

“Building Bridges and Developing Communities”

WHO WE ARE

Founded in 2023 by a group of Ugandans raised in Kampala’s urban slums, the Obuyisi Bw’omu Initiative (OBI) is a grassroots, non-profit organisation working to break the cycle of poverty affecting local communities living in informal settlements. Founder Mbalire Moses experienced first-hand the barriers of poverty, limited schooling and addiction; that experience, and the belief that change is possible at any scale, is the foundation of the OBI’s work today. From this lived understanding, the OBI has built community-led solutions to combat issues faced by the local community, including mental health challenges, limited access to education, poor water and sanitation, and climate change - partnering with schools, health centres, local government and grassroots organisations.

OUR VISION Holistic wellbeing for all children and the local community.	OUR MISSION To empower disadvantaged children and families through providing educational support, increasing mental health awareness, advocating for better sanitation and action on climate change for sustainable development of communities.	CORE VALUES Integrity, Accountability, Equity and Dynamism.
---	---	---

KEY PROGRAMME AREAS

Mental Health Awareness

Kyogere (“Say It Out”) campaign uses storytelling and humour to break stigma and educate local communities on mental health issues.

Education Support

The Flow with Dignity campaign provides girls with feminine hygiene products and menstrual education to target stigma around periods. The Backpack at a Time campaign provides essential school supplies to disadvantaged children. Support with vocational training and digital literacy skills through the E-Ghetto Initiative.

Water, Sanitation & Health - W.A.S.H

The SITUKA! Bulamu Bwetulongoosa drive advocates for clean water and good hygiene practices in Bwaise’s urban slums to reduce preventable diseases.

Climate Change Action

Aims to create school-based climate clubs to educate and equip students with the tools to become more climate-conscious and help to create practical solutions to combat climate change.

IMPACT & PARTNERSHIPS

Since 2023, OBI has delivered education and sanitation support to children and families across Kawanda and Bwaise, and is scaling towards a long-term goal of a community school and youth information centre. OBI is proud to work alongside partners including We Make Change, Meaningful.ca, Goodera, Chezuba and Aperio Philanthropy, and welcomes new funding and collaboration partners who share its mission.
